

EITR

USB TO SPDIF CONVERTER

EITR IS THE MYTHICAL ORIGIN OF ALL LIVING THINGS.
(AT LEAST ACCORDING TO NORSE MYTHOLOGY.)
WE THINK THEY HAD A LOT OF TRIPPY IDEAS.
BUT PROBABLY NONE SO BIZARRE AS
SOMETHING THAT MAKES USB SOUND GOOD.

OWNER'S MANUAL

CONNECTIONS

1 Coaxial SPDIF Digital Output. Connect this to your DAC with a high-quality cable. If you'd like, you can even use a fancy "75 ohm" version, though this doesn't make a huge difference in performance, unless you're using some unshielded, hand-braided thing that's inappropriate to digital.

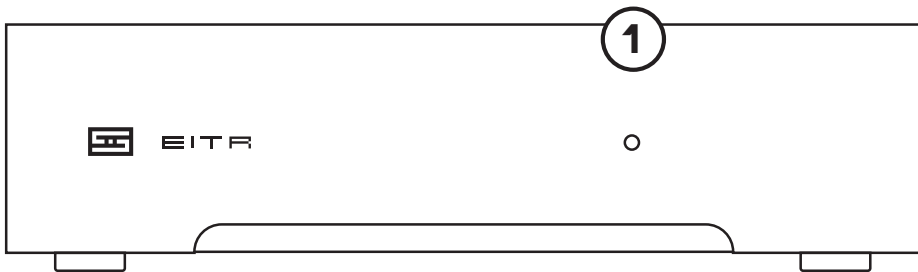

2 USB Input. Connect this to your computer with a short (2M or less) USB A-B cable that's true USB 2.0 rated. An old printer cable may not cut

it. Yak-hair insulated hand-braided versions may not cut it either. You may need to install drivers on some Windows versions. The drivers are available at schiit.com/drivers

3 Power Switch. Up is on. Down is off. Feel free to leave it on all the time if you like.

4 Power Input. Connect only to the Schiit-supplied 6VAC wall-wart, or bad things may happen.

CONTROLS

1 Power Light. When the power is switched on, this light will illuminate.

Beyond that, there are no controls. Eitr just does one thing: convert USB to SPDIF. It does this very, very well, and in a very, very isolated manner. Other than that, it doesn't do anything. So you don't need controls for timing or filters or outputs or inputs or anything like that at all.

It is probably worth noting, though, that as a self-powered USB device, Eitr won't show up as an output option on your computer unless it's turned on. Also, depending on how your computer handles its USB power management, you may need to make some adjustments on that side. If you experience glitches, drop-outs, or other USB problems, start at [schiit.com/faq/dac-problems](https://www.schiit.com/faq/dac-problems) and [schiit.com/faq/usb-problems](https://www.schiit.com/faq/usb-problems) for steps you can take to alleviate them.

2-YEAR LIMITED WARRANTY

Schiit Audio warrants to the original purchaser that this product shall be free from defects in material and workmanship for two (2) years from the date of purchase. If a defect covered by this warranty occurs during this period, Schiit Audio will repair the defective product, free of charge. Date of purchase will be based on customer receipts, otherwise date of manufacturing will be used.

If you believe you need warranty service, contact us first. Schiit Audio products sent back to us without a Return Authorization (RA) will be returned to the sender without repair. To contact us and obtain an RA, email info@schiiit.com.

Warranty Limitations. This warranty shall not apply if a product: (a) is modified or tampered with; (b) is damaged by negligence, accident, unreasonably use, or other causes unrelated to defective materials or workmanship, or (c) has had the serial number altered or removed.

Any implied warranties, including warranties of merchantability and fitness for a particular purpose, are hereby limited in duration to the warranty period of 2 years. In no event shall Schiit Audio be liable for consequential or incidental damages resulting from the breach of any implied or expressed warranties. Some states do not allow these limitations, so they may not apply to you. You may also have other rights which vary from state to state or province to province.

Application for Council Directives 72/23/EEC, 89/336 EEC
Conformity declared for EN60065, EN55022 Class B, EN50082-1

This equipment has been tested and found to
comply with the limits for a Class B digital device,
pursuant to part 15 of the FCC Rules.
