

HI. I'M FULLA 

JUST PLAYIN'

FULLA E CONTROLS & CONNECTIONS

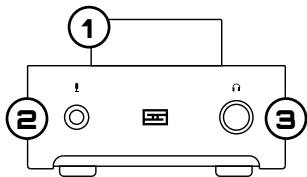

1 Volume Knob. Turn up til you smile, but not until your ears bleed.

2 Microphone Input. If you're using a headset microphone, connect it using the pink plug on the Y-adapter that is usually included with your headphones. Do not use a TRRS jack; it will not work.

3 Headphone Output. Plug your headphones in here. If you are using headphones with a headset microphone, plug the green plug from the Y-adapter that is usually included with your headphones. You may also need to use the included 1/4" to 1/8" adapter. Do not use a TRRS plug; it will not work.

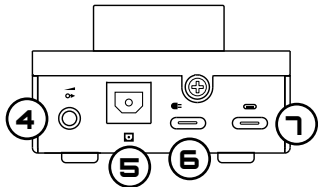

4 Preamp Output. Plug this in to your powered monitors (or a power amp) using a 1/8" TRS to dual RCA cable (for most products—others may need different cables, consult the manufacturer.)

5 Optical Input. Connect to a smart TV or other device with an optical output. Some smart TVs will need to be set to "Stereo" or "Two-Channel PCM" for this to work. Fulla 4 will automatically switch

to the optical input when it is active—it takes precedence over the USB input.

6 USB Power Input. If you get a “this device draws too much power” error, or if your source doesn’t “see” the Fulla, connect this input to 5V DC at 500mA or above with a USB-C cable. Your phone charger may work just fine (if it uses USB-C connectors, that is.)

7 USB Power and Data Input. Connect this to your computer or other USB source using the provided micro USB cable, or with another USB 2.0-rated, high-quality micro USB cable.

FULLA E OPERATION

Select “I’m Fulla Schiit” in Control Panel/Sound Devices (PC) or in System Prefs/Sound (Mac) or in the setup for your console.

On some systems, some music players will have to be set to “I’m Fulla Schiit” too.

That’s it! Enjoy the game, a movie, or some music (or suffer though that Zoom call, argh.)
