

GAME ENDER

1 USB Input. Connect to your USB source using a good-quality USB cable.

2 Optical Input. Connect to a smart TV or other device with an optical output. Some smart TVs need to be set to “Stereo” or “2-Channel PCM”.

3 Power Switch. From the front, left is on, right is off. You’ll need to turn on your Gunnr to have it recognized by your USB source.

4 Preamp Output. Plug this in to your powered monitors (or a power amp) using a 1/8” TRS to dual RCA cable (not supplied).

output gain increases 10dB with the wall-wart connected.

6 Headphone Output. Plug your headphones in here. If you are using headphones with a microphone, plug the green plug from the Y-adapter here. You may also need a 1/4” to 1/8” adapter.

7 Microphone Input. If you’re using a headset microphone, connect it using the pink plug on the Y-adapter included with your headphones.

5 Linear Override. Plug in the included wall-wart here to provide additional power or for sources that need a 0mA USB device (like iOS, iPadOS). The

8 Gain Select. Up louder, down quieter. Top is high gain, middle is low gain, bottom is negative gain.

9 Process Enable. Up turns on Width and Presence, down turns them off. Like for purists.

10 Width. Turn to the right to expand your range of hearing for gaming, turn to the left to blend it for more natural music. Or adjust as you like.

11 Presence. Turn to the right to bring voices closer, turn to the left to move them farther away. Or just choose what sounds best to you.

12 Input Select. Toggle up to hear the USB input, down to hear the optical input.

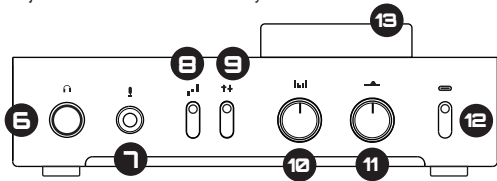

13 Volume Knob. Turn up til you smile, but not until your ears bleed.

OPERATION

For game consoles, select "Schiit Gunnr" for the headphone/speaker out and microphone input.

For PCs and Macs, select "Schiit Gunnr" in Control Panel/Sound Devices (PC) or in System Prefs/Sound (Mac) for both audio output and mic input.

That's it! Enjoy the game, a movie, or music!
