## DIGITAL TO ANALOG CONVERTER

IN NORSE MYTHOLOGY, MODI WAS ONE OF THOR'S SONS.

HERE, MODI 3 IS A DO-ALL USB AND SPDIF DAC.

LIKE MAGNI 3, IT'S ARGUABLY ALL THE DAC YOU'LL EVER NEED,

AND IT DOES IT AT A 2-FIGURE PRICE TAG!

JUST PLUG IT IN AND ENJOY.

## OWNER'S MANUAL

## CONNECTIONS

- 1 RCA Analog Outputs.** Connect the two RCA jacks, to your amp, preamp, or receiver.
- 2 Coaxial Digital Input.** Connect a coaxial digital source, using an RCA cable, 75 ohm preferred.
- 3 Optical Digital Input.** Connect an optical source to the optical input jack, using a Toslink cable.
- 4 USB Data and Power Input.** Connect a USB source using a USB micro cable (supplied).
- 5 Power Input.** Connect a 5V power source to this if you need external power. See “Operation.”

## OPERATION

**If you're using Modi 3 as a USB only DAC,** you don't need Power Input. Just connect it to your computer with the supplied USB Micro cable and you're set.

**If you're using the other digital inputs,** and you're NOT using USB, you need Power Input. Connect the supplied USB wall-wart with the supplied USB Micro cable to provide power for the other inputs. Modi 3 won't work without power, and power comes from USB.

## CONTROLS

**1 Power LED.** This lights up when you have Modi 3 plugged into a computer, or into an external power source. It doesn't signal UFOs or anything.

**2 Input Selector.** Use the toggle switch to select what you want to listen to.

Top: USB input  
Middle: Optical (Toslink) input  
Bottom: Coaxial input

Pretty straightforward, right?

## TROUBLESHOOTING

**“Draws too much power” error.** You'll need to use additional power. Disconnect Modi 3 from your source, then connect the wall-wart to the Power Input using the USB Micro cable. The Modi 3 will then report as a 0mA USB device. You'll need another cable to connect to your source.

**No sound?** Make sure Modi 3 is selected in Control Panel (Windows) or System Prefs (Mac) AND in your player software. Older Windows versions may need drivers from [schiiit.com/drivers](http://schiiit.com/drivers)
